Business Profile

Leading apparel production house in sub sahara Africa

VISION

The group having been successful in various businesses across Asia, Middle East and Africa, decided to venture into a garment manufacturing unit at Nairobi, in the country of Kenya (East Africa).

To build a clothing manufacturing empire in Africa that delivers "Farm-to-Fashion" concept to customers, wherein the entire value chain from Cotton Farming to textile manufacturing and finally to clothing can be integrated under one group – all originating from Africa.

To build an empire that can employ the skilled population in Kenya and East Africa, by using the advantage of "AGOA" status of Africa to trigger industrial growth in the Sub-Saharan Africa.

MISSION

UAL is committed to:

Total Customer Satisfaction through

- ✓ Timely delivery,
- ✓ Competitive cost,
- ✓ Reliable quality.

About Us

United Aryan (EPZ) Ltd, a brainchild of hard working individuals hailing from successful business family from Delhi, India. It was Incorporated in 2002 with only 4 sheds and 13 production lines.

Promoters of UAL are responsible for the creation of this modern and yet maintaining the traditional art of garments manufacturing, blending the artful skills of Africa and Asia.

United Aryan (EPZ) Ltd: Highlights

- Young and experienced promoters from established business backgrounds with a passion
- Established players in garment industry with expertise in sourcing and selling
- Financially sound and stable group with regional expertise and experience.
- Wide Product Mix to cater to market segments
- Environmental and Socially Sustainable Production Standards
- Professionally qualified and experienced management team
- Easy global access from Mombasa

From 2002 to 2018, we wish to continue our growth plan further & have the capacity to keep growing double digit in reasonable short time. The goal of business is to have a socio-economic impact on community and the world at large. The next goal is to have at least 100,000 direct Jobs created in near future which means 1,000,000 people get meals every day due to our project, as in Africa the ratio of one direct job to dependents / indirect jobs is 1:10. This itself is a big motivation to develop this business. We are thankful to our customers who have been associated with us for long time and who relate to our goal and support our business.

Plan towards Vertical Integration Textile Mill:

We are working on a vertical integration program wherein we will be setting up a yarn to finished Denim fabric plant with 2 million per month monthly capacity.

Dyeing & winding unit of color threads as color threads is the basic raw material for the flourishing garment industry in Kenya. Moulding Hangers & Manufacturing Cartons & also making Woven / Printed Labels inhouse

Washing

- ➔ 54 BELLY LOADER MACHINES WITH A CAPACITY OF WASHING 40,000 PCS PER DAY
- ➔ 6 FRONT LOADER MACHINES WITH A CAPACITY OF WASHING 10,000 PCS PER DAY
- ➔ CAPABILITY OF DOING ALL KIND OF DENIM WASH
- ➔ 72 DRYERS & 15 HYDRO EXTRACTERS

Printing

- ➔ 8 HEAD SCREEN PRINTING
- ➔ EQUIPPED TO ALL TYPE OF PRINTING ON KNITWEAR PRODUCTS

Finishing

- ➔ TOP STEAMERS & PRESSERS
- ➔ LEGGERS/TOPPERS & CURING OVEN, WITH A DAILY CAPACITY TO DO 8000 WRINKLE FREE PANTS
- ➔ AIRPORT SYSTEM FOR KIDS YOUTHWEAR PROCESSES

SOURCING STRENGTH

Fabric Sourcing

- Within the group, we grow & trade in cotton in Ivory Coast (West Africa) under our sister company called PGMC.
- PGMC is a standalone company within the group & exports its 100% produce of raw ginned cotton to different yarn producers in Indonesia, Vietnam, Pakistan & India,
- This in turn helps our other group company which is based in Guangzhou, China to source better yarn as it can leverage the PGMC network.
- We make different fabrics in Guangzhou (Denim, Non Denims, Knits, Woven cotton or even Polyester or cotton poly blend with or without spandex).
- This helps United Aryan get best fabric prices for their buyers. We do full package FOBs for most of our buyers including Levis & H&M.
- United Aryan itself has worked with over 100 fabric suppliers and enjoys exclusive relation with over 50 fabric mills across Far-East and South Asia, covering all fabric categories.
- Due to our fabric sourcing strength, we are able to offer very competitive prices to customers in better fabric qualities.

Trims Sourcing

- United Aryan gets the benefit of having over 250 suppliers in their database, and working in close quarters with over 80-100 suppliers based in various regions.
- United Aryan also gets the benefit of strong sourcing base of Ronex International based out of Dubai, for sourcing good quality trims & accessories at competitive price.

FACTORY COMPLIANCE AND PROCESS APPROVALS

Factory is currently fully compliant and approved by the following customers

- ➔ LEVIS
 - Since 2003
- ➔ WAL-MART
 - Since 2007
- ➔ H&M
 - Since 2011
- ➔ DOLLAR GENERAL
 - Since 2011
- ➔ COSTCO WHOLESALER
 - Since 2011
- ➔ VF CORPORATION/KONTOOR BRANDS
 - Since 2013
- ➔ BSCI
 - Since 2019
- ➔ OTTO
 - Since 2014
- ➔ CTPAT (GSV)

Process Approvals

- ➔ CERTIFIED LEVIS YOUTHWEAR PRODUCTION UNIT
- ➔ ORGANIC PRODUCTION CERTIFICATION BY C.U.E.I.C

SUSTAINABILITY

The owners and management of United Aryan EPZ Ltd are determined to create value through ethical management & development of Human and environmental resources.

A) QUALITY :

The meaning of quality for us is to consistently meet our customers' expectations with regards to our product and services. We emphasize on error prevention – not error detection, because our success is based on the quality of our products.

Our strong Quality Assurance team has been continuously training and improving workforce to ensure better reliability of in-process quality control, rather than checking.

B) EMPLOYEES :

Our employees are our greatest assets. We ensure to provide optimal working conditions, a pleasant working atmosphere, and interactive collaboration. Our goal is to create a long- term working relationship with our employees and 70% of our employees are with us since the company started in 2002.

- ➔ We consider complying with work safety measures and ensuring healthy working conditions as a matter of necessity. All social compliance norms and health & safety rules are incorporated and we ensure to maintain the same continuously.
- ➔ We continuously invest in professional skills of our employees and continuously promote their development, as we believe development and growth of our employees will only lead to growth of our company.
- ➔ The employees are continuously trained in KAIZEN methodology to incorporate continuous improvement. The employees are given opportunity to get trained with the idea of lean management and reduced wastages in every walk of life, which helps them not only in sustainable growth at workplace, but also improve their living.

C) VALUES :

Our corporate values are the guiding principles for our dealings with customers, business partners, employees, and society at large.

→ Cultural diversity

We commit ourselves to harmonize regional cultural diversities within our company. We regard the cultural diversity as our asset and a pre-requisite in shaping our success.

→ Future-oriented approach

For long-term company success, we are actively shaping changes in the market and in technology, and take on the competition with confidence.

Having been set on making garments, we are working on setting up a Textile plant within Kenya to serve and help in the growth of the garment industry in the region.

→ Fairness

Our collaboration is based on mutual fairness. We treat colleagues, employees, and external employees equally and consider their interests as important as our own. We treat them with appreciation. These manifests itself in mutual respect, courtesy, and friendliness.

→ Reliability & credibility

Our decisions are characterized by reliability and credibility: we only make promises that we can keep. The customer is always our focus. Complying with regulations and laws is a non-negotiable for us.

D) ENVIRONMENT :

With the ever-increasing threat of Global Warming all around us today, it is becoming virtually impossible to do anything without first considering its environmental impact. How much water will this use? How much energy will this consume? How much pollution will it all generate? These are all good questions among the growing list of responsibilities towards sustainable production.

The responsible treatment of nature and the environment is deep-seeded in our corporate values stated above, and is reflected in our day-to-day work. For United Aryan, the sustainable use of resources means incorporating economic, environmental, and social potentials for value growth by keeping the balance of mother nature intact.

→ Water Conservation:

a) Water treatment and monitoring:

- i) Residual water is released to the Effluent Treatment Plant of the local governing body, through their pipeline.
- ii) Periodic checks are done, and water is tested to ensure these meets the standards of water disposal as specified by local governing body.

b) Use of Green Chemicals –

United Aryan uses certified green chemicals and ZHDC certified chemicals to reduce the impact of chemicals on the residual water going into the environment.

c) Effluent Treatment Plant –

- i) Even though residual water is treated by ETP of local body, we are building a separate Effluent Treatment Plant, to treat the water into environmentally safe standards before disposing into the pipeline to the local governing body's ETP plant. This will doubly ensure that the water disposed is completely free of any harmful substances.
- ii) Capacity will be to treat **2 million ltrs daily**.
- iii) This ETP will be up and running by Q1 2020.

→ Energy Conservation –

a) Ozone Laundry System –

With the even increasing issues with the availability of **Clean Drinking Water & Global Warming**, Water-Conservation and Energy-Conservation becomes our top priority in our endeavor towards achieving sustainable production standards.

- i) Reduced Carbon Footprint - One of the biggest contributors to Global Warming is the release of Green-House-Gases like Carbon-Di-Oxide into the atmosphere resulting from the energy made with fossil fuels like coal, oil & natural gas. **Ozone system** eliminates the use of hot water which in turn play a significant role in reducing the use of energy, and thereby reducing the carbon footprint into the environment.
- ii) Ozone system also uses green chemicals and reduces the release of harmful chemicals & bleach into the residual water and thereby into the environment.
- iii) This new laundry system, with a capacity of 60,000 garments per day will be operational by Q2 2020.

b) Laser Technology for denim processing –

- i) Computer driven Laser technology replicates localized wear, whiskers and intricate patterns without the use of water, chemicals & stones. It also replaces PP spray and the discharge of Potassium Permanganate into the environment.
- ii) United Aryan is putting up modern gas-free laser finishing equipments, with a capacity of 40000 denim garments per day.
- iii) This will be operational by Q1 2020.

c) Solar Energy –

- i) We are also partially converting our energy into Solar Energy generation, and putting up solar plant that will generate 1.8 MW energy equivalent through solar, which will save 70000 tones of Carbon-Di-Oxide into atmosphere and which equals of saving 110,000 Trees in its lifetime.
- ii) This unit will be ready and running by Q2 2020.

CORPORATE SOCIAL RESPONSIBILITY

Corporate Social Responsibility is the management tool that every company needs to achieve success in a sustainable society while fulfilling its business purpose. It is also the informal expectation that a business operates in a way that is respectful to the communities and its environment.

Our company enhances this principle and have engaged with communities around in ensuring that significant contribution is made towards the betterment of the society at large.

Our nature of business requires large labour force hence we concentrate on the people around us by ensuring that their social, economic and health is our responsibility. We have engaged in these many areas as follows:

A) HEALTH :

United Aryan EPZ Ltd from the onset have engaged in educating and creating awareness on the epidemic of HIV and AIDS. The company has set up a policy which is non-discriminative and support all workers who are victims or affected by their family members. The following has been achieved

- ➔ The workers are sensitized fully on HIV and AIDS
- ➔ The company has organized training of peer educators and TOTs (Trainers of trainers). This in return creates awareness among the communities where they come from.
- ➔ Voluntary testing is also organized by the management and this has reduced the prevalence rate tremendously at the work place and the surrounding areas.
- ➔ The trainers of trainers are also equipped with knowledge of home based care for victims of HIV Aids within their areas of residences.

These has also been supported through partnership with other players

B) ECONOMIC:

Our workforce consists of 90% workers from the communities around where the business is located. This has provided suitable jobs to many in the community hence giving economic power to the community.

- ➔ The employment opportunities have helped the community to curb crime as most of the people are engaged in meaningful means of living.
- ➔ There is has also increased the purchase power since a lot of money circulate monthly in form of wages and salaries released.
- ➔ Small business blossoms around the area and the community around are empowered.
- ➔ 100,000 people directly benefit from our organization (In Africa ratio of direct job : indirect job + dependent, is 1:10)

C) SOCIAL:

- ➔ United Aryan EPZ Ltd has taken keen interest to support the physically challenged persons by giving them employment opportunities enabling them to contribute in the society as well.
- ➔ The women has also been empowered has we encourage single mothers, widows and others to take up employment opportunities by training then as machinist as a result of which our workforce now consist of 70 % women employees.
- ➔ The youths have also been engaged largely and as a result the crime in rate the community has come down tremendously
- ➔ The organization also support youth activities like sponsoring Football team where over 40 youths are engaged on active football playing and engagement in community works.
- ➔ The organization has also engaged in supporting religious activities engaging with Churches in support of infrastructure.

D) TRAINING PROGRAMME:

Our organization, as part of CSR has engaged the community in Technological transfer and is offering free training in the use of industrial machines for garment making and in the last 5 years have trained 4800 machine operators and over 70% been absorbed in the organization and the rest are absorbed in other organizations within the same industry. This is an ongoing program and has greatly transformed the community from the use of manual machines to use of industrial machine thus increasing their job prospects. The target groups are youths, single mothers, windows and physically challenged persons.

E) NETWORKING & COLLABORATION:

Our organization takes special interest to networking and collaborates with other government and non-government organizations that deals with and enhances the well-being of the community around us. This includes:

- x **St. Joseph Catholic Church Mulolongo** – They support and train youths from poor families who are unable to further their education due to lack of school fees and offers them technical training in garment making. (We further their skills and where possible absorb in the industry).
- x **Shad rack Juma Foundation Baba Dogo** – They offer trainings to young women who are either single mothers or are very poor families and have no means of income generations and often engage in immoral practices like prostitution or drug abuse.
- x **Kenya women Children Wellness Centre** – Deals in implementation program to eliminate Gender Based Violence, eliminate cultural barriers that prevent women from financial liberation through capacity building on entrepreneurship skills, building linkages, association and networking with potential employers and mentors, as a means to unlock the barriers and empower women to shape the future and destiny of their communities.

Training Centre

GROWTH

United Aryan EPZ Ltd is dedicated towards job creation and welfare of the people of East Africa. The only way of achieving this is continuous growth, and our management believes, self-sustenance is the order of our future.

Capacity/Turnover –

After having started in 2002 with a capacity of 250,000 units per day, company has grown to a capacity of 1.8 million pcs per month across woven and knits segments, after 16 years.

Even though the business to USA & Europe is driven by market challenges, still we have grown during the last 5 years in terms of annual turnover and production capacity

2011-2012: 17%

2012-2013: 14%

2013-2014: 12%

2014-2015: 22%

2015-2016: 11%

2016-2017: 12%

2016-2018: 18%

During this time,

- ➔ Turnover – increased by 170%
- ➔ Investment towards expansion (based on yearly turnover): 5-10% average.
- ➔ Work Force – Increased by 180%

Denim Mill:

Moving towards the direction of Self-sustenance and our strategy of “Farm-to”-Fashion”, our management has a vision to open a Denim mill in Africa. Africa has its source of Cotton in West Africa (Ivory Coast) that is suitable for denims and using up the raw materials in order to create more job opportunity inside Africa is our goal.

This will ultimately be resulting in MADE-IN-AFRICA brand, right from cotton cultivation to export of readymade garments, thereby creating the concept of FARM-TO-FASHION within the region.

Planned capacity of denim fabric – 22.0 million meters / year

Planned capacity of spinning – 12 million kgs / year.

With abundant supply of water, electricity, raw materials, skilled labor, good finance facilities and advantage of port in the region, this denim mill can supply fabric to factories across Sub-Saharan region.
